

EXPLANATION OF CONSENT AGENDA ITEM E.2.c.(7) March 22, 2017

ITEM:

Consideration of authorizing staff to issue a formal solicitation for the Cruise Terminals 6 and 10 Scour Mat Repair project. (Patrick Hammond / Bill Crowe)

EXPLANATION:

An underwater dive inspection was performed in March 2014 that revealed areas of concerns in regards to erosion along the berth walls. The repair and installation of scour protection mats will provide the needed protection for the berth walls and pier structures in order to maintain safe cruise operations.

The scope of work for this project includes various sub-aqueous repairs to the existing scour protection mats along the berths at CT 6 & 10. In addition to repairs of the existing scour mats, additional mats will be installed to prevent future erosion along the cruise berths. This erosion is caused largely by the movements of the various cruise ships at the terminals. Soil fill will be placed in needed areas in order to facilitate the installation of the new mats.

Staff recommends approval

Prepared by Patrick Hammond, E.I./Bill Crowe, P.E.
