November 2, 2018

## LOCAL NOTICE TO MARINERS

Canaveral Harbor Channel

### DREDGING OPERATIONS

The Dredge CHARLESTON along with support equipment and tending tug Commander, will commence dredging operations north of the Canaveral Harbor Channel on or about November 24, 2018. Although, the dredging operations will occur outside of the channel, a submerged pipeline will be placed, perpendicular across the channel at a depth of no shallower than 46' MLLW. The dredging work shall continue until approximately April 1, 2019. The approximate location of the pipeline is shown on the attached drawing (highlighted in red).

The Dredge Operator will standby on channels #13 and #16 VHF-FM. For any emergencies the dredge operator can be reached at 757-286-3484.

All mariners are requested to call the dredge, by means of VHF radio, 30 minutes prior to arrival in the channel, to ensure the dredge, equipment, and barges are secured out of the way of vessels to ensure safe passage. Operators of vessels of all types should be aware that the dredge is held in place by cables, attached to anchors some distance away from the equipment. Buoys are attached to the anchors so that the anchors may be moved as the dredge advances within the channel. Mariners are cautioned to strictly comply with the Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, buoys, cables, barges, derricks, wires and related equipment.

Owners and lessees of fishnets, crabpots and other structures that may be in the vicinity and that may hinder the free navigation of attending vessels and equipment must remove these from the area where tugs, tenderboats and other attendant equipment will be navigating. Since the project will be conducted twenty-four (24) hours per day seven (7) days a week, all fishnets, crabpots and structures in the general area must be removed prior to the commencement of the work.
